Professional Summary

As an Industrial-Organizational Psychologist, I specialize in training evaluation, assessment development and validation, leadership assessment and development, occupational health, and work motivation. As a Research Psychologist at the Center for Army Leadership, I focus on advancing leadership assessment and development by overseeing and contributing to multiple research initiatives. My work centers on ensuring the validity, reliability, and fairness of leadership assessments while maintaining alignment with Army regulations and professional standards. With a background in both quantitative and qualitative research methods, I provide evidence-based insights that help shape leadership development strategies. I also collaborate on creating tools designed to foster self-awareness and professional growth among leaders. My role involves communicating complex research findings to stakeholders, offering actionable recommendations that drive improvements in leadership practices. In my previous role as a Research Psychologist with Leidos working for the Naval Submarine Medical Research Laboratory, I led applied and research projects that involved implementing leadership development programs, evaluating and enhancing psychological readiness, and developing and validating assessments of core leadership competencies within specialized operational communities (e.g., submarine and nuclear field duty). My research focused on the intersection of psychological need satisfaction at home and work, exploring how this interaction influences work recovery, well-being, motivation, and burnout. Through my work, I applied theoretically driven, empirically tested, and data-informed practices to advance the readiness and effectiveness of the undersea warfighter community.

Education

University at Albany, State University of New York

Doctor of Philosophy — Industrial-Organizational Psychology ● 2023

Dissertation: *Barking up the Wrong Need: How Basic Psychological Need Satisfaction at and Outside of Work Interact to Influence Work Recovery*

University of Wisconsin Oshkosh

Master of Science — Experimental Psychology ● 2017

Thesis: *Anxiety, Attention, and Mindfulness Following Focused Attention and Open-Monitoring Mindfulness Meditation*

Bachelor of Science — Psychology (Neuroscience Minor) ● 2014

University of Wisconsin Fond du Lac

Associate of Arts and Science — Business Emphasis ● 2011

Honors/Awards

Magna Cum Laude – University of Wisconsin Oshkosh	Spring 2014
Dean's List – University of Wisconsin Oshkosh	Spring 2014
Honor Roll – University of Wisconsin Oshkosh	Fall, 2012, Spring 2013
Highest Honors – University of Wisconsin Fond du Lac	Spring 2011
Honors – University of Wisconsin Fond du Lac	Spring 2010

Grant Activity

Navy Sustainment 2024

- Role: Co-Investigator
- Funding Source: Defense Health Program
- Amount Awarded: $265,000
- Project Title: Submariner Training Success: Developing a Statistical Model of Cognitive and Psychological Health for Predicting who will Graduate from the Submarine Training Pipeline
- Funding Period: 05/01/2024 - 09/30/2025

Navy Restoral 2023

- Role: Co-Investigator
- Funding Source: Defense Health Program
- Amount Awarded: $130,000
- Project Title: How Psychological Need Satisfaction and Motivation Influence Burnout in Submariners

Matthew D. Hanson, Ph.D.

Providence, RI 02903 ● (920) 296-6076 ● matthew.d.hanson@outlook.com

- Funding Period: 10/1/2023 - 09/30/2025

Benevolent Association Research and Creativity Grant

- Role: Co-Investigator
- Funding Source: University at Albany Benevolent Association
- Amount Awarded: $480
- Project Title: Barking up the Wrong Need: How Basic Psychological Need Satisfaction at and Outside of Work Interact to Influence Work Recovery
- Funding Period: 01/1/2023 - 04/30/2023

Poster presentation at the annual convention of Midwestern Psychological Association, Chicago, IL.

Professional Experience

Research Psychologist (GS 13) U.S. Army Center for Army Leadership ● Fall 2024-Present

- Drive high-impact research initiatives focused on leadership assessment and development, shaping strategies that enhance leader effectiveness across the organization
- Develop and validate leadership assessments to ensure fairness, accuracy, and compliance, directly influencing Army policies and talent management decisions
- Design and implement leader development tools that promote self-awareness and continuous growth, empowering leaders to maximize their potential and drive mission success
- Lead the development of reading and writing assessments for an Army-wide leader development program that synergizes evaluation and development processes to save the Army $250,000 by replacing external solutions with cost-effective, Army-specific alternatives
- Facilitate the negotiation and drafting of Memorandums of Understanding (MOU) between key stakeholders, ensuring aligned goals and mutually beneficial outcomes that drive collaboration and support organizational objectives
- Analyze complex data sets using regression modeling, structural equation modeling, and analysis of variance to deliver actionable insights, improving leadership assessment tools and decision-making for Army leaders and stakeholders

Research Psychologist Leidos (contracted to Naval Submarine Medical Research Laboratory) ● Fall 2021-Fall 2024

- Led and executed innovative, high-impact research to predict and enhance key personnel and operational outcomes, driving data-informed strategies that improved performance and decision-making within the organization
- Produced clear, compelling research reports that effectively communicated complex methodologies, findings, and actionable insights, enabling stakeholders to make informed decisions and implement practical solutions
- Applied evidence-based I-O psychology principles to design and implement psychological assessments, directly addressing the U.S. Submarine Force's unique needs and enhancing leader and workforce effectiveness

Matthew D. Hanson, Ph.D.

Providence, RI 02903 ● (920) 296-6076 ● matthew.d.hanson@outlook.com

- Leveraged advanced statistical analyses, including structural equation modeling, regression modeling, analysis of variance, and item response analyses, to analyze complex datasets, identifying key trends and providing actionable insights that informed strategic decisions and policy development, improving overall operational efficiency
- Represented Leidos and the U.S. Submarine Force to present findings at major professional conferences and military briefings, contributing to the knowledge base and fostering a culture of continuous improvement through the dissemination of evidence-based practices

Research Project Assistant SUNY Research Foundation ● Fall 2019 - Spring 2023

- Conducted factor analyses to establish validity evidence for a scale measuring refugee job search obstacles
- Performed research focused on gaining insight into refugee and immigrant job search obstacles and privacy concerns
- Identified and synthesized key academic articles on informal learning in the workplace, providing a robust foundation for further qualitative research
- Conducted in-depth interviews with professionals across various industries, exploring their experiences and insights into informal learning practices within the workplace
- Presented the results and implications of the research to stakeholders and academic audiences across the U.S.

Scientific and Regulatory Affairs Intern Reynolds American, Inc. ● Summer 2020/2021

- Performed research centered on gaining insight into how vapor product usage changes over time
- Utilized SeeQ to establish and analyze complex longitudinal vaping topographical and demographic datasets
- Presented the results and implications of my research to organizational leaders and C-suite executives

Student Assistant New York State Department of Health ● Summer 2018

- Developed a questionnaire to measure obstacles preventing submitters from moving to paperless test submissions
- Generated ideas to streamline the specimen testing process
- Developed longitudinal reports that tracked test and requisition numbers
- Entered specimen, test, and demographic data into the clinical laboratories information management system
- Standardized the language used between laboratories

Business Development Specialist The Dieringer Research Group, Inc. ● Winter 2017 - Summer 2017

- Prepared PowerPoint and Word research proposals that were aimed at addressing potential clients' key initiatives
- Researched and networked with outside consultants to estimate incidence, cost, and feasibility
- Prepared sales and opportunity reports for the business development department, sales team, and CEO
- Managed the new sales, opportunities, and contacts sections of the Customer Relations Management system
- Prepared preliminary pricing quotes for new opportunities

Research Experience

Development of an Army Writing Assessment

Co-Investigator, Center for Army Leadership

- Collaborated with government partners to pilot an Army-specific writing assessment to replace a costly commercial alternative.
- Secured necessary approvals to ensure alignment with Army policies and assessment standards
- Developed the assessment framework, including methodology and analysis plans to evaluate validity, reliability, and fairness

Development of an Army Reading Assessment

Co-Investigator, Center for Army Leadership

- Led an Army-specific reading assessment through pilot testing to evaluate its reliability, validity, and fairness
- Conducted statistical analyses to ensure the assessment met rigorous psychometric standards
- Presented key findings to an audience of research psychologists, providing evidence-based recommendations for implementation

Evaluation of Content Validity for Submarine Force Leadership Competency Items

Co-Investigator, Naval Submarine Medical Research Laboratory

- Designed and implemented a rigorous methodology to gather criterion-related validity evidence for the Submarine Force Leadership Competency Model, drawing upon assessment development and validation best practices
- Authored and refined competency measurement items and a content-related validation method for a specialized instrument aimed at evaluating leadership competencies within the submarine force

Matthew D. Hanson, Ph.D.

Providence, RI 02903 ● (920) 296-6076 ● matthew.d.hanson@outlook.com

- The validation method I devised has been adopted by the Navy for broader use in gathering criterion-related validity evidence across various leadership competency models

Examining the Impact of Psychological Need Satisfaction and Motivation on Occupational Health Outcomes

Co-Investigator, Naval Submarine Medical Research Laboratory

- Crafted a comprehensive research protocol to investigate whether psychological need satisfaction can reduce burnout over time by enhancing autonomous motivation in students enrolled in the rigorous Power School at the Naval Nuclear Power Training Command
- Results will provide evidence-based insights to support the development of interventions aimed at improving student resilience and motivation, contributing to enhanced occupational health within military training contexts

Submariner Training Success: Developing a Statistical Model of Cognitive and Psychological Health for Predicting Sailor Success

Co-Investigator, Naval Submarine Medical Research Laboratory

- Authored a detailed protocol to evaluate the effectiveness of a psychological readiness assessment designed for the submarine force, assessing its predictive validity for submariner success using a comprehensive set of criteria
- Implemented a thorough assessment approach, utilizing multiple criteria to gauge the accuracy and reliability of the psychological readiness screen in predicting short- and long-term success in submarine training and operations
- Results will contribute to refining the psychological assessment methods used by the submarine force, providing data-driven insights to improve selection and training outcomes for future submariners

Evaluating the Impact of Submarine Environment Fit Assessment Reports on Students' Prospective Occupational Well-Being

Co-Investigator, Naval Submarine Medical Research Laboratory

- Authored a novel research protocol to assess the impact of providing enlisted students with feedback on personality attributes critical for fleet success, focusing on prospective job satisfaction and work-related self-efficacy
- Results will contribute actionable insights to support and refine training programs, ensuring better alignment of students' personality attributes with the demands of the submarine environment, thereby promoting long-term occupational well-being

Nuclear Power Training Command Sailor Development Program Evaluation

Co-Investigator, Naval Submarine Medical Research Laboratory

- Developed four distinct research protocols to evaluate the effectiveness of various development programs at the Naval Nuclear Power Training Command, targeting diverse populations including students, staff, and instructors
- Created specialized evaluation methods for each target population, ensuring that the protocols accurately measure the outcomes relevant to students, staff, and instructors
- Results will provide actionable insights to enhance the design and implementation of development programs at the Naval Nuclear Power Training Command, contributing to improved training, professional growth, and overall performance within the command and nuclear community

Barking up the Wrong Need: How Basic Psychological Need Satisfaction at and outside of Work Interact to Influence Work Recovery

Independent Doctoral Dissertation, University at Albany, SUNY Supervised by Jason Randall, Ph.D.

- Performed a comprehensive literature review that bridges Self-Determination Theory, Conservation of Resources Theory, and Effort-Recovery Theory to propose novel and consequential hypotheses
- Developed and implemented a research study to examine how psychological need satisfaction at work and home interact to influence work recovery and well-being
- Conducted a linear regression and a polynomial regression with response surface analysis to test hypotheses that proposed how psychological need satisfaction at work and home interact to influence work recovery and well-being

Training Evaluation Efforts to Help Professionalize Direct Support Professionals

Student Training Evaluator, University at Albany, SUNY Supervised by Jason Randall, Ph.D.

- Collaborated with the New York State Office for People with Development Disability to improve an Informed Decision-Making training program
- Collected data from 37 employees who participated in an Informed Decision-Making training program and completed evaluation surveys before and after the training

Matthew D. Hanson, Ph.D.

Providence, RI 02903 ● (920) 296-6076 ● matthew.d.hanson@outlook.com

- Evaluated trainees' declarative knowledge, ability to recognize superior behaviors, self-efficacy, affective and utility reactions, and motivation to transfer
- Co-authored an anterior Scope of Work Report and a posterior Technical Report, which summarized the research questions, project objectives, and the deliverables and reported on the results of the Informed Decision-Making training evaluation, respectively

Staying Focused When Nobody is Watching: Self-Regulatory Strategies to Reduce Mind Wandering during Self-Directed Learning

Graduate Research Assistant, University at Albany, SUNY — Supervised by Jason Randall, Ph.D.

- Examined the factors that contribute to successful learning in an online, self-directed training setting
- Supervised up to 12 researcher assistants
- Contributed to writing an Army Research Institute grant proposal focused on measuring informal learning in the workplace
- Developed the theory and design for an original research study to examine the influence of mindfulness and sham mindfulness in a formal training environment

Exploring the Impact of Family Responsibilities and Perceptions on Career Outcomes: A Comprehensive Review and Methodological Training Initiative

Graduate Research Assistant, University at Albany, SUNY — Supervised by Ho Kwan Cheung, Ph.D.

- Coded 1,159 articles about family responsibilities, perceived need, commitment, competence, and warmth, and career outcomes
- Developed a training to teach undergraduate research assistants how to search for journal articles
- Developed the theory and design for an original research study to examine the influence of mindfulness in a diversity training

Anxiety, Attention, and Mindfulness Following Focused Attention and Open-Monitoring Mindfulness Meditation

Independent Master's Thesis, University of Wisconsin Oshkosh — Supervised by Phan Hong, Ph.D.

- Developed the theory and design for an original study to examine the effects of mindfulness meditation on affect, anxiety, attention, and mindfulness
- Programmed the experiment using E-Prime
- Produced audio recordings for mindfulness meditation and control sessions

A Meta-Analytic Review of Safety Climate Across Industries: Measurement Types, Levels, and Correlational Analysis

Graduate Research Assistant, University of Wisconsin Oshkosh — Supervised by Lixin Jiang, Ph.D.

- Coded 100 articles about safety climate by industry, level, and type of safety climate measure
- Reported correlation coefficients and alpha levels for variables related to safety climate

A Field Experiment Examining Mindfulness on Eating Enjoyment and Behavior in Children

Graduate Research Assistant, University of Wisconsin Oshkosh — Supervised by Phan Hong, Ph.D.

- Examined the effects of mindfulness on affect, anxiety, stress, mindfulness, and grades in children aged 4-9
- Conducted on-site mindfulness activities and trained children to be mindful
- Presented information about the study, including the background and method, to teachers and parents
- Organized and managed the everyday functioning of four sites
- Supervised eight researcher assistants

The Impact of Mindfulness Practices on Affect, Anxiety, Stress, and Academic Performance in College Students

Graduate Research Assistant, University of Wisconsin Oshkosh — Supervised by Phan Hong, Ph.D.

- Examined the effects of mindfulness on affect, anxiety, stress, mindfulness, and grades in college students
- Produced audio recordings for a mindfulness session and a control condition session
- Organized a mindfulness and control session to be administered during the first ten minutes of each class period
- Managed the everyday functioning of the study with ten graduate and undergraduate researcher assistants

Psychopathic Callous Affect as a Predictor of Empathic Concern and Happiness Toward Those in Need

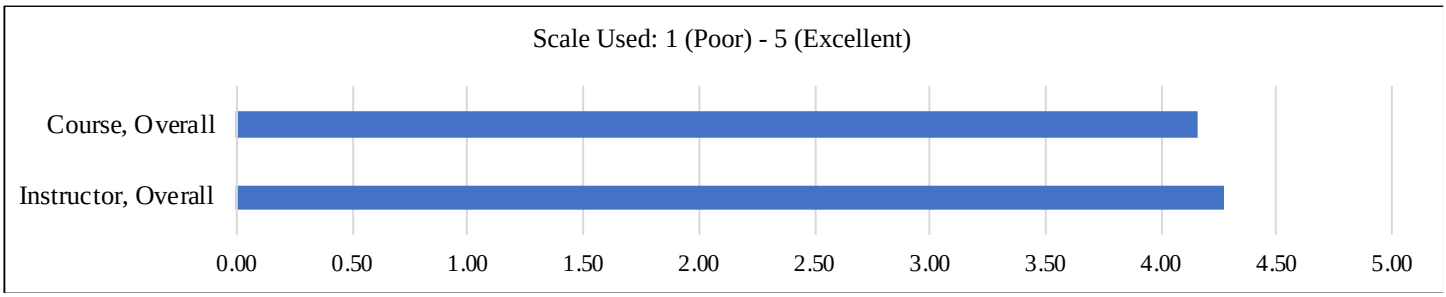

Graduate Research Assistant, University of Wisconsin Oshkosh — Supervised by David Lishner, Ph.D.

- Examined the effect that positive and negative outcomes have on the relationships between callous affect, happiness, and empathic concern
- Gathered data from participants by running them through a controlled situation that included deception

Teaching Experience

Matthew D. Hanson, Ph.D.

Providence, RI 02903 ● (920) 296-6076 ● matthew.d.hanson@outlook.com

Instructor of Record – Industrial/Organizational Psychology (122 students) University at Albany, SUNY ● Spring 2021

- Responsibilities
  - Designed all aspects of the course, including presentations, assignments, and assessments
  - Assessed students' learning through discussions, quizzes, papers, and exams
  - Maintained live, weekly office hours and tutoring sessions upon request
  - Led class using Blackboard, PowerPoint, and Zoom
  - Provided consistent feedback to students related to each lesson taught
  - Managed and tracked students' attendance and participation
- Teaching Innovations
  - Integrated a Spotlight on Science segment into the lectures to introduce the students to new research in the field of I/O Psychology, with an emphasis on researchers from marginalized backgrounds

Instructor of Record – Industrial/Organizational Psychology (130 students) University at Albany, SUNY ● Fall 2020

- Responsibilities
  - Implemented and administered predesigned presentations, assignments, and assessments
  - Assessed students' learning through discussions, quizzes, papers, and exams
  - Maintained live, weekly office hours and tutoring sessions upon request
  - Led class using Blackboard, PowerPoint, and Zoom
  - Provided consistent feedback to students related to each lesson taught
  - Managed and tracked students' attendance and participation
- Teaching Innovations
  - Synthesized PowerPoint, Zoom, and Blackboard to record and post lectures for students to follow along
  - Incorporated TED Talks from world-renowned scientists to introduce cutting edge, groundbreaking ideas from accomplished researchers and science communicators

Instructor of Record - Learning (22 students) University at Albany, SUNY ● Summer 2019

- Responsibilities
  - Designed all aspects of the course, including presentations, assignments, and assessments
  - Assessed students' learning through discussions, projects, and formal assessments
  - Maintained live, weekly office hours and tutoring sessions upon request
  - Led class using Blackboard and PowerPoint
  - Provided consistent feedback to students related to each lesson taught
  - Managed and tracked students' attendance and participation
- Teaching Innovations
  - Synthesized textbook material with current events and real-life, relevant examples
  - Scaffolded the students' learning experience with a gradational research proposal

Service

Assistant Editor The Journal of Business and Psychology ● 2018 - 2017

- Reviewed each incoming manuscript for scope, plagiarism, contribution, APA style, quality of writing, and appropriateness of methods and analyses
- Identified the strengths and weaknesses of each manuscript
- Developed an initial decision about the next steps in processing the manuscript
- Exchanged thoughts with the Editor-in-Chief
- Drafted decision letters, as needed

Graduate Student Panelist University at Albany, State University of New York ● 2018 - 2018

Matthew D. Hanson, Ph.D.

Providence, RI 02903 ● (920) 296-6076 ● matthew.d.hanson@outlook.com

- Fielded questions from undergraduate students regarding graduate school and the application process
- Elucidated the field of Industrial/Organizational Psychology for undergraduate students
- Advised undergraduate students regarding graduate school in general and how to pursue a graduate degree in Industrial/Organizational Psychology

McNair Scholar Mentor University of Wisconsin Oshkosh McNair Scholarship Program ● 2015 - 2015

- Coached the McNair scholars in conducting statistical analyses using SPSS
- Assisted the McNair scholars in conducting thorough literature reviews

Transition Success Analyst University of Wisconsin Oshkosh Counseling Center ● 2014 - 2015

- Examined the success of students as they transitioned through their entire undergraduate education via the *Making Achievement Possible Works* survey
- Coded qualitative data into themes and categories
- Designed reports to be presented to the *Making Achievement Possible Works* coordinator and the Counseling Center

Volunteer Winnebago Mental Health Institute ● 2011- 2012

- Empowered dozens of patients with mental illnesses by interacting with them through activities
- Organized fun activities for the patients with a social worker and a recreational therapist
- Utilized active listening in order to effectively aid in the progress of multiple patients
- Tutored one patient towards the successful completion of the General Education Development (GED) test
